PROFESSIONAL SUMMARY

Full Stack Software Developer with 4+ years of experience designing, developing, and maintaining scalable web applications, internal platforms, and data integration solutions. Experienced in .NET, C#, JavaScript, SQL, PostgreSQL, MongoDB, REST APIs, and AWS cloud services. Skilled in backend development, third-party integrations, event-driven architectures, and performance optimization. Strong understanding of software engineering best practices, system reliability, and maintainable application design.

SKILLS AND TECHNOLOGIES

C#, .NET, Javascript/Typescript, HTML, CSS, REST APIs, GraphQL, Event-Driven Architecture, MS SQL Server, PostgreSQL, MongoDB, AWS (Lambda, SQS, SNS, S3), Docker, Containerization, Agile Development, Logging & Monitoring, System Integration, UI/UX Fundamentals

WORK EXPERIENCES

JobTarget PH / Talleco.com (HCM – Recruitment Software) | Cebu City, Cebu, Philippines

Full Stack Developer | February 2025 – Present

- Built event-driven backends on AWS (Lambda, SQS, SNS, S3) to improve scalability and fault tolerance.
- Delivered client-facing and internal features that enhanced user experience, maintainability, and operational efficiency.
- Maintained and supported multiple applications, including mission-critical client-facing systems and internal tools that enable workflows across business divisions.
- Contributed to modernization efforts with UI redesigns and usability improvements across multiple applications.
- Diagnosed and resolved production software and data incidents to restore workflows and reduce downtime.
- Tuned data pipelines and database operations in MS SQL Server, PostgreSQL, and MongoDB to improve throughput and accuracy.

Mid-Level Software Developer | March 2024 – February 2025

- Implemented web application features and integrated third-party systems to extend platform capabilities.
- Designed and maintained CRM workflows ensuring secure data access, updates, and auditability.
- Optimized data retrieval and reporting processes to improve performance and data quality.
- Configured and managed data integrations from XML, RSS, and API feeds with transformation logic.
- Troubleshoot data issues using SQL and automation scripts to support reporting and operations.

Junior Level Software Developer | July 2022 – March 2024

- Enhanced internal tools to streamline configuration and customer success workflows.
- Supported customer success teams by diagnosing and resolving configuration problems.
- Improved reporting performance and data accuracy through query and process optimization.
- Consolidated multiple data sources into normalized, translated datasets for downstream use.
- Investigated and remediated integration failures caused by source feed defects and processing errors.

EDUCATION

Bachelors of Science in Information Technology (2022)

University of Cebu – Lapu-Lapu and Mandaue Campus, Cebu, Philippines

- Programming, UI/UX, and Software Development

Science, Technology, Engineering, and Mathematics (STEM) – SHS

University of Cebu – Lapu-Lapu and Mandaue Campus, Cebu, Philippines
